

Bumblebee-friendly area

Bumblebees and other pollinators do a really important job, making sure that we have plenty of the nutritious and delicious fruits and vegetables that keep us happy and healthy.

Bumblebees get all of their food from flowers but unfortunately there are no longer enough flowers to keep our friendly local pollinators happy and healthy.

That is why we have created a bumblebee-friendly space, packed with flowers that provide lots of food for bumblebees and other pollinators.

Why not stay for a moment to see if you can see any
bumblebees buzzing around?
